

Albuquerque's New \$100,000 High School a Model of Modern Construction and Efficiency

Splendid Building Will Be Ready for Furnishing By the First of August

Easily the Largest and Most Complete Building of Its Kind in the Whole Southwest With Every Detail of Approved School Equipment Fully Provided for in Architecture and Furnishing.

BUILDING PRACTICALLY IS FIRE PROOF FROM BASEMENT TO ROOF

Big Auditorium Will Seat Eight Hundred While Modern Gymnasium With Floor Space 65 by 35 Feet Gives Ample Room for Indoor Sport and Exercise. Manual Training, Domestic Science and Scientific Equipment Absolutely Complete.

Workmen today began construction on the walls of the third story of Albuquerque's new \$100,000 high school building, and the contractors now expect that the roof will be on the building within sixty days and are reasonably certain to complete the contract by the first of August, or a good fifteen days ahead of the time specified in the contract. The building will be complete in construction, installation of equipment and furnishings well ahead of the opening of the next schoolistic year, in September, and with the completion, Albuquerque will have in use what is beyond any question the finest building of its kind in the southwest and one which will compare very favorably with any high school building in any city in the country.

The building has now progressed to the point where a very good idea of its completed form may be had. It is proving not only up to but far ahead of the hopes of the board of education in appearance and arrangement and is going to prove fully as satisfactory as its designers claimed.

This building gives Albuquerque a public school equipment which is a distinct credit to this city and which would be a credit to a city of double its population. It is thoroughly modern, designed along the lines of the most approved school construction from its gneiss-tile lighting system, to its splendid forced draft heating and ventilating system. Its construction is massive, the whole an impressive pile and while not strict in a fire-proof building, it is really a fire-proof structure since boiler rooms, floors, ceilings and walls are of full reinforced concrete. A trip through the building is necessary to realize its completeness and attractiveness, but since it will not be opened to public inspection by the contractors for several months, this Herald yesterday sent a representative through the building with Superintendent John Milne.

The Investment Represented.
While the actual construction contractor varied for but \$78,515.00, the building completed, with its grounds will represent an investment of close to \$125,000, although the bond issue for the building was for but \$100,000. The money has been invested approximately as follows, although the detailed statement of expenses will not be made public by the board of education until the completion of the building:

Original investment in grounds	\$15,000.00
Additional ground purchased	5,000.00
Contract price	78,515.00
Heating and ventilating contract	12,000.00
Vacuum cleaner (approximate)	1,500.00
Retaining wall and grounds	5,000.00
Furniture (approximate)	1,000.00
Approximate total	\$121,515.00

The furniture will be paid for from current school fund levies, and the ground has been paid for from savings.

Men Welcome Mother's Friend

A Duty that Every Man Owes to Those who Perpetuate the Race.

It is just as important that men should know of progressive methods in advance of motherhood. The suffering, pain and disease incident to child-bearing can easily be avoided by having at hand a bottle of Mother's Friend.

This is a wonderful, penetrating external application that relieves all tension upon the muscles and enables them to expand without the painful strait upon the ligaments. Thus tension is avoided all those nervous spells, the tendency to nausea or miscarriage, the discomforts and a sunshiny, happy disposition is preserved that reflects wonderfully upon the character and temperament of the little one soon to open the eyes in bewilderment at the joy of his arrival. You can obtain a bottle of "Mother's Friend" at any drug store at \$1.00 and get a free printed booklet on every health, enables her to make a quiet and complete recovery, and thus with renewed strength she will eagerly devote herself to the care and attention which mean so much to the welfare of the child. Write to the Bradfield Regulator Co., 129 Main Street, Bradfield, Mass., for their valuable and instructive book of guidance for expectant mothers. Get a bottle of Mother's Friend to-day.

CENTRAL BUILDING WILL BE USED FOR THE OVERFLOW.

The Central school building, now used by the high school classes, will

COUNTY SCHOOLS STRONG FOR THE HIGH SCHOOL

Believed That Meeting Monday Night Will Give Enthusiastic Approval to County High School Levy.

Of the 190 hundred and ten pupils in the Albuquerque high school at present, thirty-five live outside of Albuquerque and pay tuition of \$1.50 per month. It costs the city of Albuquerque approximately \$44 a year for each high school pupil. Why should not the county pay for all pupils in the city high school and give them the advantages which the county high school law makes possible?

This is the question which is being put out to the school directors of the county districts by County Superintendent Montoya, who is inviting them to a conference Monday night at the Central school, when the county high school plan will be laid before them and it is believed, will meet with the approval of a large majority.

Under the county high school law a levy of not to exceed two mills may be made in each school district for the purpose of either establishing a county high school or of aiding in the support of the city high school where county high school pupils will then be received free of any tuition. Thus far the county school directors approached have favored the utilization of the law and it is hoped that their consent may be obtained in definite form on Monday night.

Arrangement of Building.

The building has three entrances,

the main entrance on Central Avenue leading into an enormous hall which extends through the building from east to west, and also by way of a broad stairway to the second floor, opening by a flue-lit lobby and two wide doors into the auditorium. On either side of the Central Avenue entrance are offices, those on the west, including office and private offices of the city school superintendent, and the school board room. On the east side are the principal's offices, and a rest room for teachers and students. A large janitor's room is under the stairway, and large locker rooms for boys and girls at either end of the building, the boys' rooms at the east and the girls' at the west end. These are to be fitted with modern toilet equipment and steel lockers.

DOMESTIC SCIENCE AND MANUAL TRAINING ROOMS.

The entire southwest corner of the ground floor is given over to the domestic science department. The space is splendidly lighted and will be divided into a sewing room, sitting room, model kitchen and dining room.

The corresponding space at the northeast corner of the ground floor will be used by the manual training department, now housed in an old building on the rear of the grounds. The new rooms will be fitted with every machine equipment of the fully complete manual training school.

The Big Gymnasium.

The feature of the building which is exciting most enthusiastic approval from both boys and girls is the huge gymnasium, located at the rear of the building on the northwest corner, and the only basement room, aside from the big fireproof boiler and heating rooms which occupy similar space on the northeast corner. The gymnasium has an unobstructed floor space 26 by 95 feet, and is cement throughout. It is large enough for dash racing, basketball and indoor baseball, and is finished with a spectators' gallery having a seating capacity of about four hundred. Under the gallery are lockers and showers for boys and for girls. The gymnasium will be fully equipped and will be by far the best in New Mexico.

THE AUDITORIUM AND SECOND FLOOR ROOMS.

The broad stairway leads from the main entrance to the auditorium which occupies the whole north side of the second and third floors, save for smaller class rooms. The auditorium is built with a 15-degree floor slant, and will have a floor seating capacity in front and balcony of 800, this to be filled with numbered theater chairs. The stage will seat 100 people and will be equipped with drop curtain, having a forty-foot opening. The lighting of the big room by day is excellent and the wiring calls for a perfect theater night light. The room is large enough for any school gathering and will be found in its acoustics and arrangement one of the most useful auditoriums in the city.

The south front of the third floor is occupied by a large reading room, opening through a glass partition into the library, and four class rooms. The building will have a total of fifteen class rooms.

This, briefly, is Albuquerque's new high school building, and it is safe to say that it will prove the city's best investment.

The building is built of Santa Fe brick and cement, the finishing brick being a dark reddish brown rough-hewn brick, from Butteville, Kan., particularly ugly in the single piece, but remarkably handsome in the finished wall. A slight tinge of alkali seen in the walls at present will disappear within a short time. Lyon and Axelson, the general contractors, have been especially fortunate in weather conditions this winter and have been able to proceed almost without a single serious interruption. They are well ahead of their construction schedule and are certain to finish the building well ahead of their contract time, which is August 13th.

The board also issued certificates to many institutes conductors and instructors.

"I have been somewhat cautious, but Doan's Regulates give just the results I desire. They act mildly and regulate the bowels perfectly," Geo. B. Krause, Altoona, Pa.

LIVELY INTEREST IN THE PROPOSED NIGHT SCHOOL

Two More Teachers Volunteer Their Services and Organization Meeting Promises to Bring Out a Crowd.

The latest action of the board of education, the free night school to be organized at the Central school building next Tuesday night has made a bill in Albuquerque and from present indications the organization meeting will bring out a crowd of all ages. Two more teachers yesterday volunteered their services to Superintendent Milne, making a total of seven experienced men and women who are ready to give their services free to the cause.

The two new volunteers are Miss Plant of the fourth ward school and Miss Bright, teacher of domestic science.

Every one who expects to join the night school is urged to attend the organization meeting at the Central school next Tuesday night.

SICK, SOUR STOMACH. INDIGESTION OR GAS

Take "Pape's Diaperin" and in five minutes you'll wonder what became of misery in stomach.

Wonder what upset your stomach— which portion of the food did the damage—do you? Well, don't bother. If your stomach is in a revolt, sour, gassy and upset and what you just ate has fermented into stomach lumps; head dizzy and aches; belch gases and acids and eructate undigested food; breath foul, tongue coated—just take a little "Pape's Diaperin" and in five minutes you wonder what became of the indigestion and distress.

Millions of men and women today know that it is needless to have a bad stomach. A little "Diaperin" occasionally keeps this debate of organ regulated and they eat their favorite foods without fear.

If your stomach doesn't take care of your liberal diet without rebellion; if your food is a damage instead of a help, remember the quickest, surest, most harmless relief is "Pape's Diaperin" which costs only fifty cents for a large case at drug stores. It's truly wonderful; it digests food and sets things straight, so gently and easily that it is really astonishing. Please, for our sake, don't go on and on with a weak, distressed stomach. It's so unnecessary.

Fancy rhubarb roots, acidified, 5¢ each, the dozen; start to grow at once, E. W. F.

IS CHARLEY CATRON CITY BROKE NOW? ASK POLICE

Prominent Young Santa Fe Attorney Cheerfully Pays \$5 Fine for Speeding Racing Car, After Half Hour at Station.

Charles C. Catron, prominent young attorney of Santa Fe, member of the state legislature, and son of United States Senator Thomas H. Catron, pleaded guilty to breaking the automobile speed limit with his racing car on Central avenue yesterday afternoon and paid the first offense fine of \$5 to Judge Craig in police court this morning. Mr. Catron did not appear this morning in person, but gave the amount of the fine around to Chief McMillin.

"We didn't want to arrest Mr. Catron," said Chief McMillin this morning, "but we had to do it. I think about the only trouble is that he isn't city broke, or wasn't up to last night."

Up in Santa Fe Mr. Catron drives his automobile just about as he desires. There isn't any speed limit in Santa Fe anyway, according to authorities, and after a hard day's work in court yesterday Mr. Catron, when he went out for a spin, let the car out to about thirty m.p.h. in no time. That isn't permitted in Albuquerque, no matter who happens to be driving the driving.

Loco Arrested in Padillas.

Deputy Sheriff Antonio Chavez yesterday arrested at Los Padillas Jose Lovato, who has been at large for some six months and hunted by the county officers on a charge of assault with intent to kill Jesus Castorino at Padillas in May, 1912. Castorino, who is Lovato's brother, was badly beaten with a club or other blunt instrument.

Mr. Catron expressed the opinion that O'Grady was "one of those wise guys."

Captain O'Grady expressed the opinion that Mr. Catron is "one of those fresh guys."

There the exchange of compliments ceased and a few minutes later friends of the Santa Fe attorney appeared to secure his release. Mr. Catron was also shy his state license plate. He said he had it in Santa Fe, however, and no charge was made on that account.

Mr. Catron left at three o'clock this afternoon for Santa Fe after conferring with Judge Craig. He left via North First street, not caring to pass the traffic officer on Second street.

Chadbourne Case Continued.

Manager M. O. Chadbourne of the Albuquerque Traction company appeared in police court this morning to answer the charge of assault, preferred by Frank P. Durst, a conductor, last week, after Durst had been relieved of duty on a car because he was drinking. The manager pushed Durst as he stood on the pavement, holding to the handlebar of the car, and the conductor in falling struck his head on the pavement, causing a painful injury. He was able to appear in court this morning. Mr. Chadbourne told his side of the case as it has been related by the newspapers.

Nowhere in David Graham Phillips' book is there any stronger scene than that between the girl and her millionaire admirer who tries to make her step from the straight and narrow path in order to save her brother from prison. The fact that the girl refuses and makes a gallant fight for her honor only makes the

and Durst declared that he was not drunk. The officers say he was drunk. However, in the absence of the night men who took part in the affair, the further hearing was postponed until 3 o'clock this afternoon.

Ellegio Sanchez and A. Garcia, who pleaded not guilty to being drunk, will also be heard at 3 o'clock this afternoon.

Batch Powell and Robert Webb, arrested as vagrants, were dismissed, while Alfonso Luisa pleaded guilty to having been drunk and was fined \$5.

Gum Tones Tires of Jail.

J. A. LaCman, of now-bridegroom and son fame, slept part of this morning in charge of an officer in a tent, which served as a friend among the trainmen of Albuquerque willing to go his bond for the amount of the \$50 fine assessed against him in police court Tuesday morning after his unfortunate disagreement with his intended bride, Miss Matlock. Up to this afternoon no one had been found who cared to put up the cash.

Manager Frank White of the Conti hotel was also appeared in the police station this morning to ask for a suspended sentence for Antonio Nunes, the young Mexican fined \$50 or sixty days in jail for boshing a gun in the kitchen of the cafe Monday night. Mr. White needs the boy, who is a member of his orchestra and who he says is ordinarily a peaceful person and a good musician. The court took no action this morning.

Dinselli Held to Grand Jury.

T. E. Commissioner H. R. Whiting this morning gave his decision in the case of Lorenzo Dinselli, heard yesterday afternoon on a charge of selling liquor to an Indian. The commissioner bound Dinselli over to the grand jury under a bond of \$500 which he furnished. Dinselli's defense in the preliminary hearing was that he did not know the man to whom he sold a jug of whiskey was an Indian. The government, however, showed that Dinselli took the liquor out into a rear hallway where he delivered it to the purchaser.

Loco Arrested in Padillas.

Deputy Sheriff Antonio Chavez yesterday arrested at Los Padillas Jose Lovato, who has been at large for some six months and hunted by the county officers on a charge of assault with intent to kill Jesus Castorino at Padillas in May, 1912. Castorino, who is Lovato's brother, was badly beaten with a club or other blunt instrument.
